

Advisory External Defibrillation (AED)

Over 150,000 people die from cardiac arrests in the UK each year. Many might be saved if only their heart could be defibrillated (shocked back into rhythm) within five minutes. An Advisory External Defibrillator (AED) – with a trained operator – at the site of a sudden cardiac arrest can increase the chance of survival than CPR can on its own.

No previous First Aid knowledge is necessary to attend this course, however if students do not have a CPR certificate we can combine the two courses to make a 1-day course.

Course Content (Theory 30%, Practical 70%)

- Incident management
- Anatomy and physiology of the heart and respiratory systems
- Practical use of the AED and protocols for use
- Care and maintenance of the AED

Target Audience	Public, Business, Social Groups / Societies		
Course Duration	4 hours – New students 2 hours – Update and revalidation		
Timing	Single teaching session		
Location	Your site or one of our preferred training facilities		
Maximum Class Size	12		
Course Pre-Requisites	Mandatory – Nil Preferred – CPR or First Aid Certificate		
Student Handouts	Textbook	Workbook	Handouts
	x	✓	✓
Assessment	Completion of Student Workbook Practical assessment at conclusion of the teaching session		
Certificate Validation	1 year		
Legislative Background / Syllabus Source	European Resuscitation Council Guidelines (www.erc.edu) UK Resuscitation Council Guidelines (www.resus.org.uk)		
Cost (Individual)	Price on application		
Cost (Group)	Price on application		
Course Affiliation	AED Instructor Foundation (www.aedif.org)		
Other Information	We can advise and assist in the purchase, maintenance contract and consumables for an appropriate AED specific to your situation <i>at no extra charge</i> through our contacts at Cardiac Services Ltd. We will undertake the training on the AED you are going to use.
