

## SCENARIO: VEHICLE WITH BOAT OVER A CLIFF

Sunday, 08 May 2005

Training article for discussion by your crash rescue crews. Given the photos supplied in the article, print them out and discuss what you would do.

### Scenario:

- 4WD towing a large boat on a trailer has gone over a cliff, but not all the way!
- The 4WD and trailer are still connected with the trailer and boat securing the vehicle.
- Driver trapped by location in the vehicle, conscious and alert, but stuck.
- Equipment and bags from the back seat have fallen forward all over the driver.

### Discussion:

- What are your first priorities upon arrival on scene?
- What methods will you use to stabilise the vehicle and boat?
- How do you access the patient in the drivers seat?
- What would your initial SITREP be? Who else would you call for?
